FOR IMMEDIATE RELEASE

OSS AUTOMATION AND ORCHESTRATION DEVELOPER DIMETIS JOINS INTEL® NETWORK BUILDERS PROGRAM

DIETZENBACH, GERMANY, July 27, 2017 – Dimetis (www.dimetis.com), a leading software developer of Operations Support Systems (OSS) and broadcast solutions, announced today has joined the Intel® Network Builders program - a program designed to accelerate the adoption of network functions virtualization (NFV) and software defined networking (SDN) based solutions in telecommunications networks and public, private enterprise, and hybrid clouds.

“Dimetis is pleased to be an active member in the Intel® Network Builders program,” said Dr. Shahin Arefzadeh, president of Dimetis. “Working side-by-side with Intel and other thought-leader partners in the ecosystem will help us all accelerate NFV/SDN interoperability and standardization. Ultimately our customers gain the benefit of well tested OSS solutions”

Dimetis has developed OpsNGN, a carrier-grade, next generation OSS automation and orchestration solution for hybrid networks supporting today’s physical-based networks, SDN and NFV domains. Using a true *Dynamic Inventory* model, OpsNGN provides service and network agility, lifecycle service automation, service assurance, and the power to scale up and out in a multi-vendor environment. OpsNGN fully integrates with existing OSS/BSS systems thus protecting current investments. Assisted by a three-layer orchestration abstraction, namely application, service and network, it can interface with and enhance other orchestrators.

“Management, automation and orchestration is a key aspect to enable NFV,” said Renu Navale, director of the Intel® Network Builders program. “Solutions from our ecosystem members, including Dimetis, help assure the operation of virtual infrastructures, and bridge together orchestration systems with physical and virtual networks. The expanding portfolio of these solutions running on Intel® architecture will help accelerate the implementation of NFV

About Intel®

Intel (NASDAQ: INTC) expands the boundaries of technology to make the most amazing experiences possible. Information about Intel can be found at newsroom.intel.com and intel.com.

Intel® Network Builders is an ecosystem of independent software vendors (ISVs), operating system vendors (OSVs), original equipment manufacturers (OEMs), telecom equipment manufacturers (TEMs), system integrators, and communications service providers coming together to accelerate the adoption of NFV and SDN solutions.

About Dimetis

Dimetis is a leading company in managing hybrid networks over the last 25 years with various projects in the telecom and broadcast OSS domains. Dimetis global installed base of customers include such operators as AT&T, A1 Telekom (former Telekom Austria), AboveNet, GlobeCast France, Hibernia (USA & Europe), Telstra Australia, and Telenor Norkring Norway.

Dimetis is a member of the TMF, IETF, ETSI NFV, EBU bodies, which are dedicated to defining functional requirements and standards for the next generation networks and emerging architectures.
