DIMETIS BOARD NAMES THOMAS WILL AS NEXT CEO

DIETZENBACH, GERMANY, November 3rd, 2017 – Dimetis (www.dimetis.com), a leading software developer of broadcast and Operations Support Systems (OSS) solutions, today announced that its board of directors has appointed Mr. Thomas Will as Chief Executive Officer effective November 1, 2017.

Mr. Will will take over the management of Dimetis GmbH in Dietzenbach, Germany, replacing Mr. Joachim Kniesel who has been managing the company's business since the company was founded in 2000. Mr. Kniesel is still available to the company and actively supports the successive transfer of responsibilities to the new leadership team. He is now working towards his well-earned early retirement.

After graduating in Media & Communication engineering sciences, Mr. Will spent over 22 years in the broadcast and service provider media industries. He served nearly 18 years at BARCO, Scientific Atlanta and Cisco in a variety of management positions before he joined Dimetis early 2017.

“Dimetis has a deep understanding of the current prevailing technology standards and longstanding relationships with our customers”, said Thomas Will, CEO of Dimetis GmbH. “This, along with our high level of vested commitment with our customers will enable us to remain a leader in the industry. We will continue to provide reliable, high-performance automation and orchestration solutions, that help deliver new services that our customers desire.”

About Dimetis

Dimetis is a leading company providing automation and orchestration solutions over the last 25 years with various projects in the broadcast and telecom OSS domains. The Dimetis global installed base of customers include such broadcasters as ARD and ZDF in Germany, as well as RAS and Rayway in Italy and network operators AT&T, A1 Telekom Austria GlobeCast France, Hibernia (USA & Europe), Telstra Australia, and Telenor Norkring Norway.

Dimetis is a member of the TMF, IETF, ETSI NFV, EBU, IABM, FKTG & SMPTE bodies, which are dedicated to defining functional requirements and standards for the next generation networks and emerging architectures. For more information please visit <http://www.dimetis.com>.
