FOR IMMEDIATE RELEASE

DIMETIS COMPLETES SUCCESSFUL DIGITAL AUDIO BROADCASTING (DAB+) ENSEMBLE CENTER PROJECT FOR RUNDFUNKANSTALT SÜDTIROL

DIETZENBACH, GERMANY, September 11, 2017 – Dimetis (www.dimetis.com), a leading software developer of automation and orchestration solutions for broadcasters and traditional telecommunications service providers, today announced the successful creation of Rundfunkanstalt Südtirol's (RAS) new DAB+ Ensemble Center.

The Dimetis **BOSS BROADCAST Manager™** software solution has been installed and utilized for many years for monitoring and controlling the Digital Video Broadcasting (DVB) playout at RAS. After integrating the BOSS BROADCAST Manager solution for the new DAB+ Playout, RAS has realized significant savings in their capital requirements and has reduced their operational expenditures (CapEx and OpEx).

Dimetis BOSS Broadcast Manager is an easy-to-use, comprehensive management software platform for monitoring, configuration, and control of streaming facilities, multiplex centers, IPTV, Digital Video Broadcasting (DVB) and Advanced Television Systems (ATSC/HDTV). Dimetis managed this project as the general contractor and delivered a complete operational turnkey solution including planning, procurement of the required devices, engineering, configuration, installation, and testing.

"In our Region Südtirol, we are completely committed to this new technology. By the end of the year we will start the shutdown process of the old FM transmitters. Dimetis has done a great job acting as the general contractor, provided us with guidance and technical expertise, and delivered powerful software that will help us for years to come", said Georg Plattner, Director of the RAS.

About Dimetis

Dimetis is a leading company providing automation and orchestration solutions over the last 25 years with many projects in the broadcast and telecom OSS domains. The Dimetis global installed base of customers include such broadcasters as ARD and ZDF in Germany, as well as RAS and Rayway in Italy and network operators AT&T, A1 Telekom Austria GlobeCast France, Hibernia (USA & Europe), Telstra Australia, and Telenor Norkring Norway.

Dimetis is a member of the TMF, IETF, ETSI NFV, EBU, IABM, FKTG & SMPTE bodies, which are dedicated to defining functional requirements and standards for the next generation networks and emerging architectures. For more information please visit <http://www.dimetis.com>.
