

# JOIN OUR TEAM OF STREAMLINING EXPERTS

BOOST YOUR CAREER

## SOFTWARE DEVELOPER BACK-END

**Streamlining Operations** – For nearly 2 decades, Television Networks, Sports Broadcasters and Media Service Providers, have trusted **Dimetis** – developer of world-class software tools. **Join our engineering team** at our headquarters in Dietzenbach.

### RESPONSIBILITIES

- Develop, maintain, optimize and test back-end services and their interfaces
- Write, unit test, document maintainable and portable code & source code
- Write technical and software design documents
- Work as part of a team and very closely with Front-End developers and domain experts

### REQUIREMENTS

- Studies of Computer Science or education as IT specialist successfully finalized with at least 3 years of Java product development experience
- Well versed in supporting the entire software development lifecycle from analysis, architecture, design, coding, unit testing to maintenance
- Experience in relational data bases, preferably Oracle and PostgreSQL
- Media/DVB-Broadcast background would be an advantage

### YOUR SKILLS

- Self-starting mindset combined with willingness to shoulder responsibilities within a project team environment as well as a productive & goal-oriented approach to work
- Excellent German and English communication and writing skills

### OUR OFFER

- Technical challenges to be targeted with state of the art tools and agile processes
- Flexible working hours & home office
- Good transport connection
- Free coffee, tea, water & parking
- Flat hierarchies with options to grow into new roles
- Permanent position with good salary
